

PROJET

Sokoban

Loïc Pierret

Lénaïc Roger

4Ttr

Informatique

Travail de fin d'année

Définition de projet

Sokoban est un jeu de stratégie en deux dimensions dans lequel le joueur doit déplacer des caisses dans des espaces désignés utilisant le moins de coups possible . Les règles suivantes s'appliquent à ce jeu :

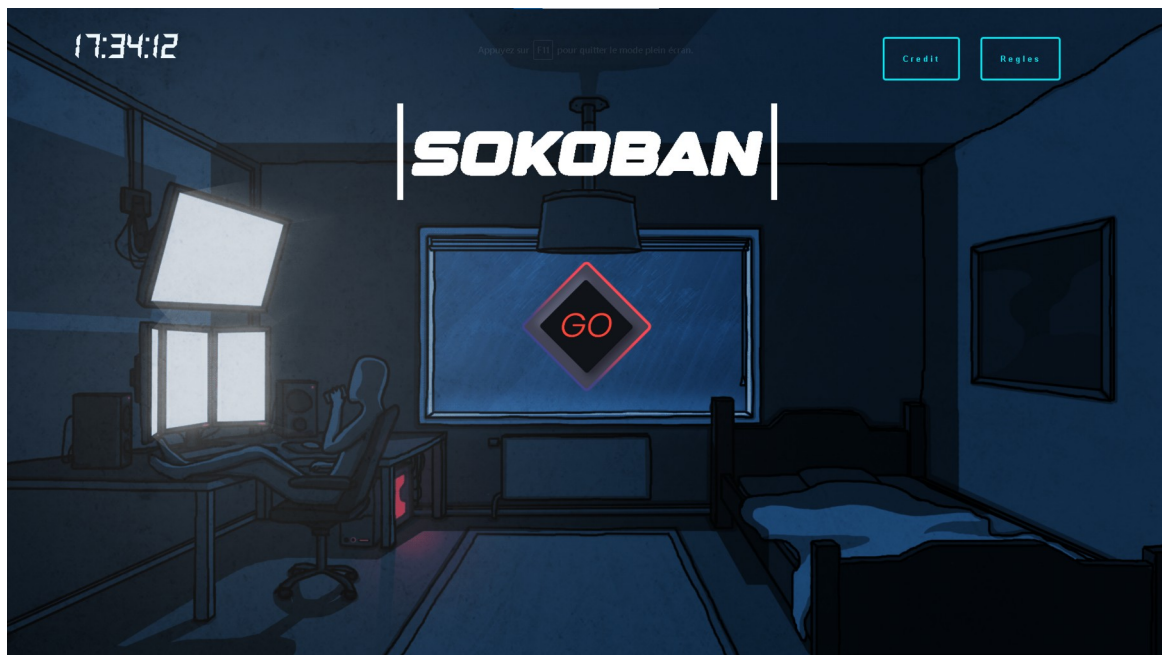

1. Vous devez trouver un moyen de déplacer toutes les caisses sans vous coincer sinon le joueur doit recommencer le niveau.
2. Le joueur peut se déplacer dans les quatre directions (haut, bas, gauche, droite) en utilisant les flèches du clavier.
3. Le joueur ne peut pousser qu'une seule caisse à la fois.
4. Vous ne pouvez pas tirer les caisses, vous devez les pousser.
5. Les caisses ne peuvent pas être poussées sur des obstacles tels que des murs ou d'autres caisses.
6. Le joueur ne peut pas sortir de la carte.

7. Le but du jeu est de placer toutes les caisses sur les croix en utilisant le moins de coups possible.

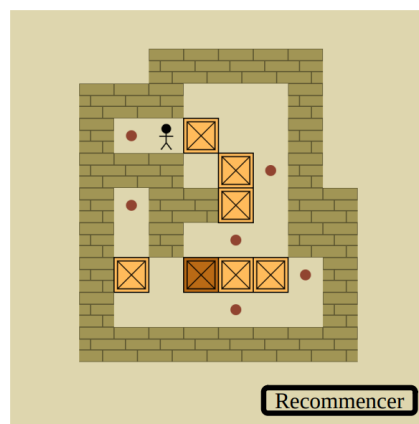

8. Une fois que toutes les caisses sont sur les croix, le niveau est terminé et le joueur peut passer au niveau suivant

Interface

Interface de l'accueil

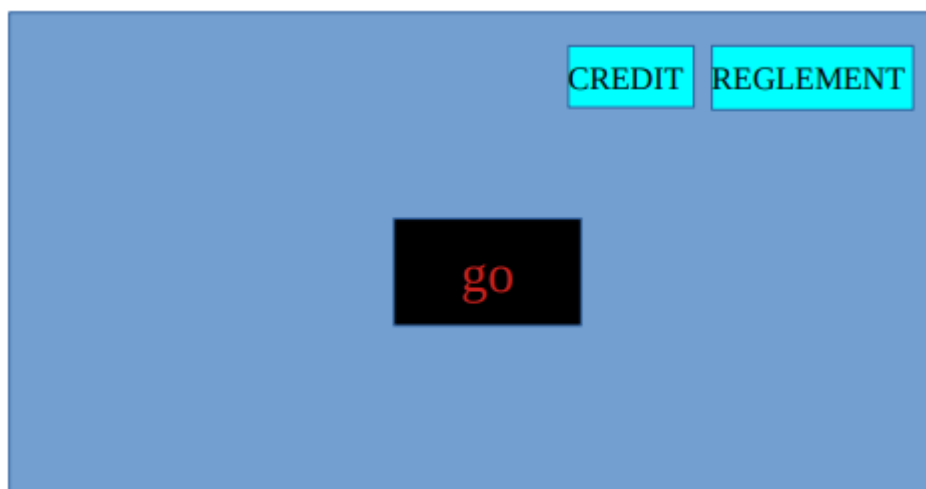

Interface en jeu

DÉFINITIONS DES APERÇUS VISUELLE ET CAS D'UTILISATION

Menu d'accueil

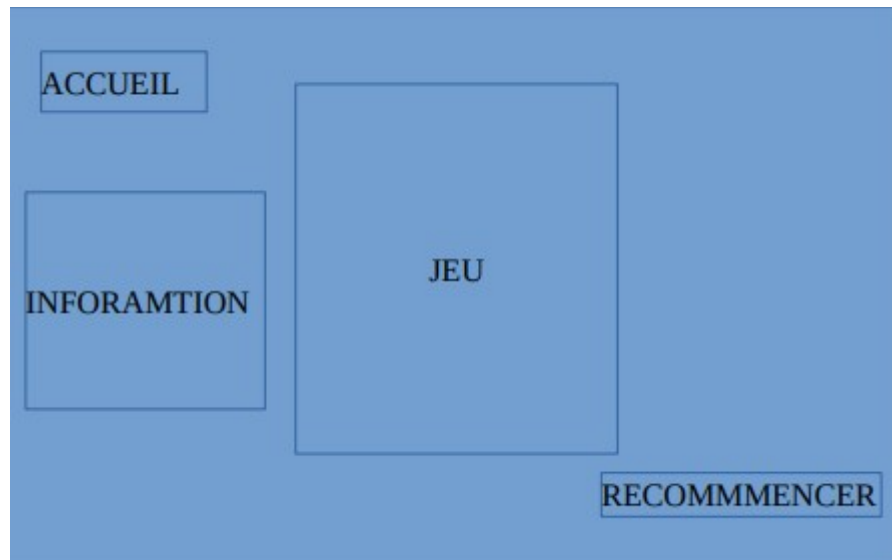

Notre menu d'accueil possède trois bouton :

-**Go** : sert à lancer le jeu. Lorsque l'on clique dessus cela nous envoie sur la page de jeu.

-**Règles** : quand on clique dessus cela ouvre un menu où l'on peut consulter les règles du jeu.

-**Crédits** : permet de voir les noms des auteurs du jeu.

Page de jeu

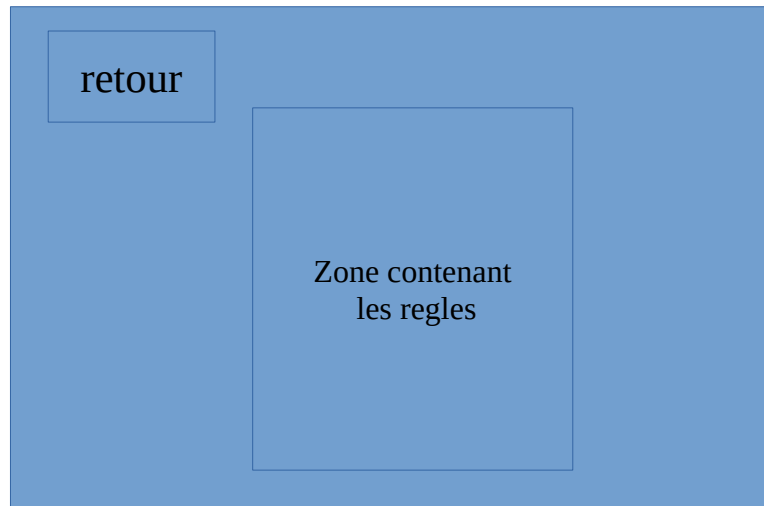

Du côté utilisateur les options possible sont le bouton « **recommencer** » et les **quatre flèches directionnelles du clavier** :

- **Recommencer** : lorsque l'on clique dessus le personnage et les caisses reviendront à leur position de base afin de recommencer le niveau.

- **Quatre flèches directionnelles du clavier**: la flèche de gauche permet d'avancer vers la gauche, celle de droite d'avancer vers la droite, celle du haut vers le haut et celle du bas vers le bas

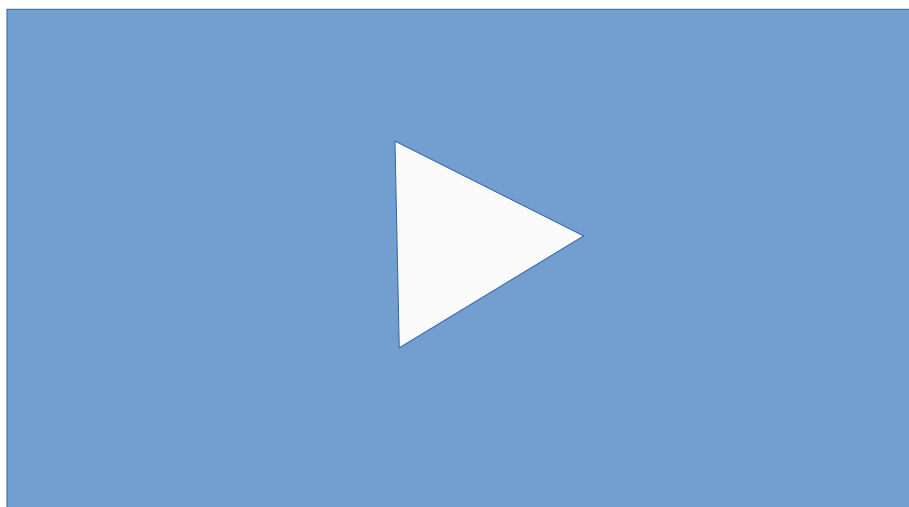

Page de règles

Sur la page de règles se trouve les règles du jeu et un bouton :

-**Retour au jeu** : -lorsque l'on clique dessus cela nous renvoie sur le menu d'accueil.

Page de crédits

4TTR : Travail de fin d'année : Sokoban : 2022-2023

Lorsque la page de crédit est ouvert cela lance une la vidéo des crédits. Quand celle ci se termine l'utilisateur est renvoyé à l'accueil

Planification

Tache à réaliser	Date prévue
Page d'accueil et page de crédit et de règle	8 Avril
Créer la grille de jeu	14 Avril
Ajouter les contrôles	18 Avril
Gérer les mouvements	22 avril
Vérifier les objectifs /Mettre à jour le score	26 avril
Collision	30 avril
Mise en place des élément restant	15 mai

État d'avancement

Pour commencer nous avons fini tout ce que nous voulions faire a la base. Comme nous avons fini on a décidé de ce lancer dans le projet de faire un bac à sable pour permettre au joueur de créer ses propres niveaux.

Mais malheureusement nous avons pas réussi a faire tout le bac à sable nous avons donc du le retirer de notre jeu.

Nous n'avons pas vraiment rencontrer de problème lors de la conception de notre projet, tout c'est plutôt passer comme on le pensait.
